

following rewritten paragraph:

Sub 8
BS
As shown in Figures 2 and 6, a movable plate 24 is used, placed over the two mandrels, so that the cuff, once it has been tightly coiled and secured with a band, can be ejected from the mandrels. This may be accomplished by applying a yoke with a handle, attached to the plate, which forces the plate forward to eject the coiled and banded cuff.

IN THE CLAIMS:

Please cancel Claims 11-16 without prejudice.

Please amend the claims to read as follows:

17. (Amended) A disposable handcuff comprising a single tightly coiled toothed strap with a single slot, toothed socket clasp at one end thereof.

BC
18. (Amended) A disposable handcuff comprising a single coiled toothed strap with a single slot, toothed socket clasp at one end thereof, further comprising a banding device holding the coil in place.

19. (Twice Amended) A disposable handcuff comprising two tightly coiled toothed straps and a two slot, toothed socket clasp at about the midpoint of said straps.

20. (Amended) A disposable handcuff comprising two coiled toothed straps and a two slot, toothed socket clasp at about the midpoint of said straps, further comprising a banding device holding the coils in place.
